- Council Strategy Committee - February 16, 2016 at 3:00pm
- Regular Council Meeting - February 16, 2016 at 7:00pm

SENIORS SOCIAL CIRCLE

Now that the New Year has begun and a new name has been adopted, the 'Lions Bay Seniors Social Circle' would like to invite everyone to participate in an Evaluation and Survey to help us effectively reach as many people as possible as we move boldly into our future. Please take a moment to fill out the attached form and return it to the Village Office either by email or in person. Thank you very much for supporting our efforts.

And remember to please join us for our weekly Tai Chi held each Tuesday at 11:15am at the Village Hall. This class is open to residents of Lions Bay.

Evaluation Form

MOBILE AIR MONITORING UNIT

For anyone interested in what the MAMU vehicle parked at the Lions Bay School parking lot is for, please read the informative notice sent by Metro Vancouver below:

Metro Vancouver's Mobile Air Monitoring Unit (MAMU) is a state-of-the-art mobile air quality station used to make air quality and meteorological measurements in locations throughout the region. MAMU is continually sampling the air at this location to measure air contaminants including nitrogen oxides (NO_x), sulphur dioxide (SO_2), fine particulate matter ($PM_{2.5}$), carbon monoxide (CO) and more. Wind direction, wind speed, temperature and relative humidity instruments on the 10 metre mast are also gathering data to help assess air quality.

The Lions Bay air quality monitoring is expected to continue until February, after which Metro Vancouver will prepare a report summarizing the monitoring results and provide it to the Village of Lions Bay.

We all share the air. Better information about air quality, such as data from studies like this, allows us to identify air quality problems and determine whether actions to keep our air clean are being effective.

For more information about the actions being taken to protect air quality, visit metrovancouver.org/air.
