RESIDENT FEEDBACK REQUESTED - ENGINEERING DESIGN OF BAYVIEW ROAD

As part of the Council approved 2016 capital budget, Public Works is preparing a request for proposal from qualified engineering firms for the engineering of the road and drainage on Bayview Road between Mountain Drive and Stewart Road (see map). Design work is expected to be completed this year with a resultant design package that we intend to tender in 2017 for construction.

Bayview Road is an urban paved road whose drainage is provided by half-pipe drains, ditches and swales intermixed with corrugated steel culverts. The Infrastructure Master Plan has identified this section of road as being in poor condition with severe corrosion of the corrugated metal and erosion of the sub-grade.

We are requesting feedback from households who live in the area and residents who frequently travel this portion of the Village's road network for anecdotal information on any issues related to the roadway that they may have experienced. Examples include:

- Positive or negative experiences while walking the roadway
- Driving experiences under all weather conditions (dry, heavy rain, snow & ice)
- Drainage issues or concerns by residents, pedestrians, drivers
- Concerns with respect to ground settlement or slopes

Any and all feedback is welcome and no comment is trivial or irrelevant.

Feedback can be sent to Public Works at works@lionsbay.ca no later than August 15.

Thanks in advance for your feedback.

COASTAL FIRE CENTRE

Campfires are currently allowed throughout the Coastal Fire Centre. Please make sure that if you have a campfire that you monitor it at all times, have the means to put it out, and when you leave please make sure it's OUT.
