BC Timber Sales Pest Management Plan includes spraying of glyphosate in the Sea to Sky Natural Resource Districts

READ THE PLAN HERE

Council has been made aware of BC's Integrated Pest Management Plan thanks to correspondence from residents. This plan includes aerial and ground spraying of carcinogenic herbicides, such as glyphosate, triclopyr and Formula 40. Further news reporting can be found **here**.

The notification of the consultation process was not widely circulated and Council is joining West Vancouver and many other voices in requesting that the consultation period be extended to properly comment on the Pest Management Plan that will include a request to stop the spray. Read Council's letter **here**.

CN remains committed to running its railway safely and efficiently and building a level of trust and collaboration with the communities where we do business.

CN is reaching out to advise communities of their vegetation control activities in the area between April and October 2022. A regularly updated schedule is available at **www.cn.ca/vegetation**

If not managed properly, trees, brush or other vegetation can severely compromise rail and public safety. Vegetation can impede the view motorists have of oncoming trains and increase the risk of crossing accidents. Moreover, unwanted vegetation can damage the integrity of the railbed, interfere with signals and switches, contribute to track side fires, compromise employee and citizens safety, reduce visibility for train crews at road crossings/train control signals and track side warning devices, to name a few of the potential risks.

CN's vegetation control program is critical to ensure safe operations and contributes to the overall safety of the communities in which they operate.
