Village Update

BLIZZARD WARNING

Special advisory – Environment Canada is calling for blizzard conditions with gusty winds between 90 and 110km/hr and low visibility overnight. In addition, snowfall with total accumulations in excess of 30 cm is expected. The strong arctic outflow winds combined with falling snow will generate blizzard conditions.

Be prepared for potential power outages! Make sure you have emergency supplies on hand and easy to access in case the power does go out.

For updates on the weather, please check the [Environment Canada website](#) for updated warning information.

Public Works crews are doing their best to keep the roads cleared as quickly as possible.
