ADDITIONAL FLUSHING DECEMBER 15th

Public Works would like to advise residents of Upper Bayview Road and Bayview Place that the flushing of their watermains will occur on December 15th, 2017. Flushing will take place between the hours of 7:30 AM and 3:00 PM.

The flushing of water mains is necessary to remove sediments that gradually deposit in the pipes over time. The Village is mandated to flush our watermains twice a year to comply with our drinking water treatment permit to operate issued by Vancouver Coastal Health.

During the flushing period, residents are advised to avoid using water to the extent possible and to place their filters, softeners and other water treatment equipment in 'by-pass' mode. Use of water during flushing will draw into the residential system the agitated sediment thereby requiring more rigorous clearing of your water lines. Water drawn in during flushing can also lead to clogged filters and screens and may

discolour laundry. During the flushing period the water will remain safe and potable, however, there may be brief periods of discoloration, cloudiness and temporary pressure fluctuations. The Village of Lions Bay accepts no liability for inconvenience or damages caused by low pressure or discoloured water use during its flushing program.

After the flushing is completed, we advise residents to clear their water lines. To do this simply let your cold water tap (remove screens/aerators on tap) closest to the incoming water line run until the water flows clear prior to returning any water treatment equipment back on line.

The Village of Lions Bay thanks you for your co-operation during this seasonal flushing program.
