

# VILLAGE UPDATE

*Tuesday, March 6, 2018*

Public Works has received complaints of dirty water from several residents along Bayview Road, Centre Road, and Crosscreek Road. We believe this to be localized sedimentation within a segment of old cast iron water main. Public Works staff will be flushing water mains along Bayview this morning to try to clear this sedimentation.

During the flushing period, residents are advised to avoid using water to the **extent possible** and to place their filters, softeners and other water treatment equipment in 'by-pass' mode. Use of water during flushing will draw into the residential system the agitated sediment thereby requiring more rigorous clearing of your water lines. Water drawn in during flushing can also lead to clogged filters and screens and may discolour laundry. During the flushing period the water will remain safe and potable, however, there may be brief periods of discoloration, cloudiness and temporary pressure fluctuations. The Village of Lions Bay accepts no liability for inconvenience or damages caused by low pressure or discoloured water use during its flushing program.

After the flushing is completed, we advise residents to clear their water lines. To do this, remove screens/aerators on the cold water tap closest to the incoming water line and run until the water flows clear prior to returning any water treatment equipment back on line.

The Village of Lions Bay thanks you for your co-operation during this water quality driven flushing.
