August 9, 2024

## UPDATES FROM THE MUNICIPALITY

### Highway 99 Repaving:

As mentioned in last weeks Village Update, Highway 99 concessionaire Miller-Capilano advises that the southbound lanes open-grade friction course (a.k.a. quiet pavement) is scheduled to be milled off next week August 6-9, utilizing lane closures only. Repaving is scheduled for August 12-16, entailing full closure of the southbound side with a counterflow in the northbound lanes—southbound drivers pass their desired exit and come back to it on the northbound side. Lions Bay Fire Rescue and Translink have been notified; in Translink's case, signage will temporarily direct southbound Route 262 bus riders to the adjacent northbound stops.

### Permitted Tree Trimming:

On August 12th and 13th Kombi Construction will be undertaking the permitted trimming and topping of Canadian National Railway trees at the foot of Tidewater. The trees are located on either side of the tracks south of Tidewater. A large bin and equipment will be stored on municipal parking through to the 14th of August. Should you have any question or concerns please call or text Brian Lawry at 604-808-5065

## UPDATES FROM THE YARD

If you missed garbage pickup or cannot make the regular pick up schedule, the Works Yard (5 Tidewater Way) is open every Friday 6am to 8am and Saturday from 8am to 11am to take organics and household garbage. A friendly reminder to only drop off during the specified times and to deposit into the applicable garbage bins.

The Works Yard cannot dispose of construction or demolition garbage. That includes but is not limited to styrofoam, e-waste/electronics, construction debris, furniture, paint and solvents, fluorescents, batteries and mattresses, which all need to be taken to the North Shore Recycling & Waste Facility at 30 Riverside Drive in North Vancouver (all the details [here](#)).

**THIS SUMMER...**

**Look out for  
banded gulls!**

Those who attended our Bird Friendly Community Event in May will have heard about Environment Canada's **Salish Sea Gull Project**. Researchers are investigating the movement, site fidelity, and survival of gulls, including around Lions Bay. Gulls are banded with a unique combination of two plastic colour bands on their left leg and a plastic colour band over a metal band on their right leg. If you see a banded gull while kayaking, boating, hanging out at the beach or anywhere else, please report what you've seen at using [their online form](#). For more info, contact [Mark.Hipfner@ec.gc.ca](mailto:Mark.Hipfner@ec.gc.ca).
