

I'm a lawyer, a tech entrepreneur, and a Lions Bay parent. My kids go to school in the forest, and I've spent two years volunteering with the Events Committee, hosting: Canada Day, Oktoberfest and Easter. At those events, I kept hearing the same thing: residents don't feel heard.

The Village's own 2026 survey confirms it: only 27% of us feel we have a real say in municipal decisions. I'm running to change that — to consult before deciding, publish the reasoning and the data, and make Council a place where residents can disagree respectfully and still be heard. Politics should feel inviting, not exhausting.

My priorities are concrete. Get the infrastructure numbers straight in public: the Village's own asset plans put the funding gap at roughly \$640,000 to \$900,000 a year. Publish the ranked list; put life-safety first — water, slopes, fire. Grow revenue from the visitors who already come, through managed parking and trailhead amenities, rather than returning to residents. Fund the 2021 wildfire plan and add water storage for drought and firefighting. Make Bear Smart transparent, with published data and a collection schedule that works for working households. And in my first 90 days, move a motion to bring rideshare and delivery service to Lions Bay. Finally, cell coverage isn't a luxury, its a safety issue that deserves serious attention.

I've chaired a national board and spent a decade turning dense regulation into plain language. I know how to run a meeting that ends in a decision.
